

sealoc[®]

In 2017 we left our corporate jobs in Dallas and founded sealoc in the City of McKinney, Texas. With BIG dreams in our hearts we combined our knowledge of AV Technology, with our DESIGN experience. We wanted to create technology solutions that could extend entertainment from inside the home and bring it to the outdoors. Covid fueled that mission, and we began to offer weatherloc[®] treated Outdoor Smart TVs for Residential use. The idea caught on and we have since sold TVs in over 40 states and have continued to add new products and grow our list of new weatherloc[®] treatments for small electronics.

From Our Dreams to Your Reality!

Our Brand

Through our proprietary weatherloc® technology, sealoc produces the highest quality and longest lasting outdoor digital displays, crafted smart televisions, and AV accessories in the world. The sealoc standard of excellence is rooted in one simple core value: exceptional customer experience. sealoc is a solution centric digital engagement provider that transforms how people and technology connect to elevate brand loyalty, fuel value and drive enablement for brands to scale, through impactful customer experience. As the industry leader in end-to-end outdoor digital solutions – our partnerships are valued as much as our products.

Our Offerings

Digital displays are changing the image of spaces while enhancing productivity and collaboration. At quick-service restaurants, digital signage and menu boards are gaining adoption. Commercial digital signage displays simplify operations, reduce labor costs, provide informational messaging, advertising, entertainment. sealoc solutions will transform the experiences.

Our Partnerships

The best collaborations create something bigger than the sum of what everyone can create on their own. sealoc is a solution centric digital engagement provider that transforms how people and technology connect to elevate brand loyalty, fuel value and drive enablement for brands to scale, through impactful customer experience. As the industry leader in end-to-end outdoor digital solutions – our partnerships are valued as much as our products. Our customers and their customers expect the best and take pride in delivering on that commitment. Our experienced team strategizes, designs, deploys, manages, and supports solutions that are simple-to-use, scalable, serviceable, and measurable to ensure objectives are met and success is achieved.

What Our Partners Say About Us

“We’re all keenly aware of the importance of partnerships and as Legrand AV has worked tirelessly to expand our signage industry partnerships, we’ve been most impressed by the sealoc team. It’s not often that you find a truly mutual relationship where the give-and-take is matched. The opportunity Legrand AV and sealoc bring to the market is providing complete hardware solutions that are vetted to meet and exceed your quality and experience expectations.”

Michelle Montazeri, Digital Signage Manager, Legrand AV

Our Success at a Glance

Our customers and their customers expect the best and take pride in delivering on that commitment.

Our experienced team strategizes, designs, deploys, manages, and supports solutions that are simple-to-use, scalable, serviceable, and measurable to ensure objectives are met and success is achieved.

LA Dodgers

Opportunity: Stadium renovations and expansions to modernize and improve customer experience and upgrade the 56,000-seat historic ballpark.

Solution: Digital displays were placed throughout the Centerfield Pavilion, providing fan engagement and entertainment in a completely outdoor area – allowing for year-round, all-weather enjoyment.

BIGSHOTS GOLF

Opportunity: Tech-driven "entertainment" experience company needed outdoor displays to support their brand promise, providing the best in luxury entertainment venue experience, providing customer engagement within open-air driving range tee boxes.

Solution: Hundreds of sealoc proloc eco displays and weatherloc® mounts provide numerous locations with the highest level of customer engagement though the industry's most reliable all-weather solutions.
proloc eco Displays + Mounts

Walk-On's Sports Bistreaux & Bar

Opportunity: New Construction, build out required outdoor displays to provide a unique outdoor dining experience for Sports bar. Replacement solution needed in franchises for existing outdoor displays that failed.

Solution: Outdoor dining and pavilions are critical for demanding customer experiences. sealoc's weatherloc® displays, tv's and AV solutions help ensure customers are always engaged.

Why Our Customers Love Us

"We've been honored to work with the LA Dodgers and supply them with many of their TVs and displays. sealoc's proloc outdoor displays are ideal for a commercial environment like a stadium, where the sun can be bright, and the weather can be relentless."

Phil Shuyler, Owner Weatherproof Televisions / LA Dodgers TV Supplier

sealoc®

Where We Shine Brightest.

sealoc's lineup of outdoor displays, digital signage, outdoor tvs, direct-view LED signs, mounting solutions and other accessories are designed to work across virtually every vertical industry. sealoc has a product uniquely suited for your industry and application, all manufactured to the highest quality standards.

House Of Worship

From digital signage to live video feeds, effective display technology in a place of worship can enhance the experience for parishioners, fostering participation and building a stronger network among the congregation. As a vital tool for sharing information, the use of display technology creates opportunities for greater outreach and engagement.

Mixed-Use and Lifestyle Centers

The destination is the experience! Date night, family night, fun and laughter with friends and family while attending an event, shopping or dinner has been the pinnacle of entertainment for more than a century. Digital engagements not only enhance the experience, but also provide direction, increased dwell time, opportunities for monetization and create an overall optimized customer experience.

Museums-Cultural

Meeting visitor expectations in a rapidly changing digital world, museums and cultural centers are embracing digital display technologies to enhance the experience and provide curators with new and creative approaches to captivate audiences in thoughtful and exciting ways. Video display canvases provide a compelling platform for dynamic simulations and presentations that absorb audiences and activate the senses. Immersive display solutions take visitors on journeys exploring worlds of science, art, history and culture, inspiring imagination, and discovery.

QSR Dining

Whether a small cafe, a global chain, or a destination attraction, don't risk a negative customer experience. sealoc understands how important return visitors are to your success. Offering great food and service isn't enough anymore - you must differentiate yourself to draw and retain your customers. Engaging and entertaining is critical to keep your customers returning, and sealoc can ensure you achieve that goal.

Retail

Digital display technologies continue to reshape the retail experience at every point in the shopper to buyer journey. From enticing customers with striking product visuals at the entrance to engaging them with immersive marketing content and helpful information at key moments throughout the store. Digital engagements provide the ultimate way to engage consumers and drive further influence and loyalty through real-time data capture and analytics.

Sports & Entertainment

In the digital age, sports venues are the pinnacle for the biggest and boldest integrations of visual technology that create an exhilarating atmosphere for sports entertainment, driving excitement and electrifying crowds. State-of-the-art display and engagement technologies are an integral part of the gameday experience, providing a dynamic platform for spectacular imagery, live action, immersive content and where to buy the best food, drink, and apparel.

Transportation

As the travel sector forever expands, they evolve at a rapid pace – enhance by the digital world to meet the growing expectations of today's passengers. At the center of this trend are major facility and technology innovations that aim to add value to hubs and facilities that engage and improve the passenger experience.

Amusement Parks

Amusement parks can be an unforgiving environment - from splashes and spills to bright sunlight conditions, to accidental bumps and bangs from excited guests. sealoc's weatherloc® displays are designed to protect your investment with years of worry-free service regardless of the environment. Our exceptionally high-bright displays are specifically designed to combat bright sun and built to withstand challenging environments, while having a modern, sleek, and progressive style.

Corporate Communications

It's time to find something new at the office. Reinvention is happening on a global scale, and as the hybrid workplace continues its rapid evolution, preparation for the future is all about continually updating for the present. Driving easier room reservations, improved space utilization, increased productivity, and better employee experience.

DOOH Media

Digital out of home media (DOOH) is about reaching people with stories, to captivate audiences and keep them engaged. Vivid and dynamic display solutions are vital technologies for improving the viewer experience. By reinforcing outdoor media with striking imagery and engaging viewers through interactive content, and stories that are brought to life.

Healthcare

Healthcare facilities including hospitals, clinics, wellness centers can better engage visitors and improve the patient experience with engaging display technology. Large format displays and video walls invigorate health facility lobbies and help alleviate patient anxiety by creating an engaging atmosphere. Interactive display solutions immerse visitors in wellness education and offer a powerful medium for inspiring patients through storytelling.

Higher Education-Institution

Digital transformation is reshaping higher education and the most visual example of this trend is the adoption of display technology across university campuses. Display solutions are well suited to academic environment, as today's college students have grown up in a technological world and are accustomed to these tools. Digital engagements not only provide effective communication, the opportunity to monetize and provide emergency notifications – they also demonstrate that an institution is forward looking which builds continued credibility in the minds of students.

Hospitality

The hospitality industry is hyper focused on improving the guest experience to foster customer loyalty and long-term success. Digital engagement strategies are imperative for meeting today's consumer expectations in the hospitality space. Delivering curated content that engages, informs, and entertains. Digital technologies add value to hospitality centric businesses by providing tools that engage guests and display content to inform, direct, and promote onsite amenities. Bright, ultra-high-resolution displays provide clear content that is exceedingly visible in busy environments.

sealoc®

Why Sealoc?

Through our proprietary weatherloc® technology, sealoc produces the highest quality and longest lasting outdoor digital displays, crafted smart televisions, and AV accessories in the world. Partnering with industry leaders and providing end-to-end digital engagement solutions to some of the globe's most recognizable brands. The sealoc standard of excellence is rooted in one simple core value: exceptional customer experience begins with fun, engaging and impactful employee experience.

Our Exclusive Solution

weatherloc®

(*verb* weth-**er**-lok; *adjective* **weth**-er-lok; *noun* weth-er-**lok**)

Definition of weatherloc®

verb

the proprietary process developed by sealoc, by which sensitive electronics and other outdoor products are shielded from weather, adverse elements, and corrosive environments - thereby expanding products lifespan, enhancing experience, and positively impacting economic ROI.

adjective

weatherproof is not enough, weatherloc® is the is the trusted solution.

noun

to properly ensure your outdoor products maximize their lifespan, use weatherloc® technology.

weatherloc®

- Proprietary nano coating
- Engineered to withstand temperature range of -30°F to 140°F
- Thermal management
- Dynamic hydro management
- Hydrophobic, acoustically transparent, and atmospherically regulating
- World class component design manufacturing
- Solution centric research and development
- Ecologically and economically friendly

sealoc 

WEATHERLOC® SOLUTION

The proprietary process developed by sealoc, by which sensitive electronics and other outdoor products are shielded from weather, adverse elements, and corrosive environments - thereby expanding products lifespan, enhancing experience, and positively impacting economic ROI.

sealoc's nano-coating solutions are both ecologically and human friendly. Both ROHS and REACH compliance ensures that it does not have hazardous chemicals that can impact human health or the environment.

Unlike less-expensive and less-effective topical coatings, sealoc's exclusive **weatherloc®** conformal nano-coating process creates a microscopic surface layer that is applied via a specialized, full-immersion process.

This creates a super hydrophobic, conformal nano-barrier across and within the entire product without the need for masking connections points.

This nano-barrier creates a protective 100° positive contact angle for water and liquids, insuring they cannot adhere to the surface. This safeguards components from short-circuits, corrosion, or electrical fouling.

Unlike traditional coating materials, sealoc's **weatherloc®** conformal nano-coating solution is permanently adhered to all surfaces, thus allowing electrical connection points to function normally, and circuitry to ventilate, reducing the likelihood of premature PCB failure due to overheating.
